Masked Vigilantes On Silent Motorbikes

Sept 9 2022 – Feb 12 2023 : Poster House : New York

Poster House in New York is dedicated to presenting the impact, culture and design of posters, both as historical documents and methods of contemporary visual communication.

Through temporary exhibitions, a growing permanent collection, and educational events, Poster House explores the enormous impact of posters on society and culture, and how they have been adapted to contemporary use.

Their latest exhibition : **Masked Vigilantes on Silent Motorbikes** is not an exhibition of posters as art, but of art that incorporates found, re-configured, and even shredded posters as raw material for making new art, re-purposing the poster's innate ability to communicate succinctly and en masse.
